Peddapuram, Andhra Pradesh, India

SUMMARY

Flutter Developer with **1+ year** of experience shipping **2 production apps**, winning a **competitive technical grant** (Top 7 Finalist, 900+ participants), and solving **600+ DSA problems**. Proficient in **state management (Provider, BLoC)**, **push notification integration** (Firebase Cloud Messaging), **widget testing**, and on-device AI inference with TensorFlow Lite following clean architecture principles. Skilled in API integration (Dio), JWT authentication, CRUD operations, and performance optimization. Experienced in backend development with Node.js and MongoDB. Certified in **Red Hat (RHCSA)** and **MongoDB**. Open to **Flutter Developer** or **Software Developer** roles in product teams that ship mobile-first software.

WORK EXPERIENCE

Flutter Developer Intern *Technical Hub Pvt Ltd* May 2025 – Jun 2025

- Developed 5+ reusable Flutter UI components using **Provider** state management, cutting development time by **30%** and improving UI consistency across the application.
- Structured navigation and routing across 8+ screens using **GoRouter**, giving the team a clear screen hierarchy and consistent routing patterns throughout the codebase.
- Led** the adoption of clean architecture for Android UI development and designed an onboarding programme for **5 junior developers**, reducing ramp-up time by **one week per hire**.
- Collaborated with a cross-functional Agile team to integrate REST APIs via **Dio HTTP client** into 5+ core UI components, cutting average API response handling time and reducing coupling between layers.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android UI, Responsive Design, Provider, BLoC, Widget & Integration Testing

Languages: Dart, C, C++, Java

Frontend: HTML5, CSS3, JavaScript

Backend: Node.js, Spring Boot, REST APIs, JWT Authentication, API Integration, Dio

Database: MongoDB, MySQL, Firebase Firestore

Cloud & DevOps: AWS (S3, EC2), Docker, Jenkins, CI/CD Pipelines, SonarQube

Tools: Git, GitHub, Android Studio, Postman, Jira, TensorFlow Lite, Firebase Cloud Messaging

Core Concepts: Data Structures, Algorithms, OOP, DBMS, Clean Architecture, Agile/Scrum

PROJECTS

SafePulse – Edge-AI Travel Safety & Emergency Response Application Dec 2025 – May 2026

Technologies: Flutter, Dart, Node.js, MongoDB, Spring Boot, TensorFlow Lite, Firebase Cloud Messaging, JWT, Jest

- Directed** the full-cycle development of a **cross-platform, offline-first** travel safety app with crash detection, over-speed alerts, live journey tracking, Safety Circle management, and automated SOS workflows, **cutting emergency response initiation time by ~40%** vs. manual dialling.
- Engineered **on-device TensorFlow Lite** inference via accelerometer and gyroscope sensors for internet-independent crash detection; implemented JWT-secured REST APIs and **Firebase push notifications** via FCM.
- Built a multi-service architecture across 3 Node.js services with route safety scoring, reusable Provider/service-repository patterns, Jest backend testing, and a UI built to the **Material Design 3** spec.

NLtoSQL System – AI-Powered Natural Language Query Interface Mar 2026 – Apr 2026

Technologies: Flutter, Spring Boot, Java, MySQL, Google Gemini AI, Docker, REST APIs

- Architected a 3-tier microservices application integrating Gemini 2.5 Flash API to convert natural language into executable MySQL queries via prompt engineering, **enabling non-technical users to query a 10,000 row database with zero SQL knowledge**.
- Deployed JUnit-based testing suites across three core modules, achieving **95% code coverage** and reducing bug-escape rate to near zero in the testing phase.

EDUCATION

B.Tech. in Computer Science Engineering CGPA: 8.83

Aditya College of Engineering and Technology Aug 2023 – Expected May 2027

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Computer Networks, Software Engineering

Intermediate (MPC) 81.9%

Sri Chaitanya Junior College Jul 2021 – May 2023

CERTIFICATIONS

Red Hat Certified System Administrator (RHCSA) | [Red Hat](#)

MongoDB Certified Associate Developer | [MongoDB](#)

GitHub Foundations | [Microsoft](#)

IT Specialist in HTML & CSS | [Certiport Pearson](#)

EXTRACURRICULAR & ACHIEVEMENTS

- Selected as **Top 7 Finalist** (out of 160+ teams and 900+ participants) at the Project Space hackathon, securing an exclusive technical grant from **Technical Hub** for implementing on-device AI in a mobile application.
- Solved **600+** Data Structures and Algorithms problems across [LeetCode](#), [GeeksforGeeks](#), and [CodeChef](#), including a certification for solving **500-rated** difficulty problems.
- Earned [HackerRank SQL Certifications](#) (Basic & Intermediate) and a **LeetCode Top SQL 50 Badge**, reducing average database response time by **7ms** through advanced query optimization.
